DESAPRO MILEX Shielded Cases

Designed from the ground up with conductive materials, controlled interfaces, and integrated shielding strategies, MILEX enclosures provide the mechanical foundation required to achieve electromagnetic performance in demanding environments.

Your Last Stop on the Road to the Black Box

MIL-STD-461G
MIL-STD-188-125-2
NSA 94-106
FCC Part 15
CISPR 32
IEEE 299-2006
IEC 61000-5-7

Engineering

Continuous conductive enclosure construction
EMI gasketing and controlled seam interfaces
Shielded I/O and filtered penetration integration
Bonding and grounding interface design
Aperture and ventilation shielding strategies
Compatibility with system-level EMC architectures

Applications

Tactical communications systems
Deployable command and control
Electronic warfare and ISR payloads
Industrial control and embedded systems
Secure and shielded transport solutions
